PROJECTS

- **Text to Handwritten Document Generator**

Link - <https://hand-writting.vercel.app>

Created a text-to-handwritten document generator that turns digital text into various handwriting styles, allowing users to personalize their documents. This tool is now used by over 500 people, showing that it meets their needs and is easy to use. Working on this project helped me improve my web **development skills** and taught me how to **solve real-life problems** effectively.

- **Online Food order WebApp**

Link - <https://food-store-main.vercel.app/>

Developed a user-friendly food ordering app that allows customers to browse, select, and order meals with ease. The app also includes features like real-time inventory updates and secure payment options. With positive feedback from users, this project helped me enhance my front-end development, responsive design, and database management skills while improving my ability to **work with APIs and ensure Data security**.

- **Lost & Found - KHOJ**

Link - <https://Lost-And-Found-main>

I am developing a lost and found web application that connects users to report and recover lost items easily. The platform allows users to upload item details and search for lost belongings, enhancing community engagement. Through this project, I am strengthening my **full-stack development, database management, and user interface design skills**, while also learning about **effective communication and community building**.

TECHNICAL SKILLS

- **Development** : HTML + CSS , JavaScript , Bootstrap, React JS, PHP
- **Database**: MySQL
- **Tools**: Git & Github, Vercel, Vs Code
- **Subjects** : Computer Network , DBMS, Data Structure, Software Developments(fundamentals)

CERTIFICATIONS

- **Certified Web Analyst - Accenture**

Through the Accenture Certified Web Analyst program, I gained in-depth knowledge of web analytics and the importance of data-driven decision-making for optimizing website performance. This experience strengthened my ability to analyze user interactions, improve network efficiency, and apply strategic insights to enhance online engagement and connectivity.

Windows for IT Support: Troubleshooting Basics - LinkedIn

Completed the Windows IT Support: Troubleshooting Basics course, which enhanced my skills in diagnosing and resolving common issues using built-in tools like Reliability Monitor, Event Viewer, and Security Console. Gained hands-on experience in remote troubleshooting and system optimization for Windows environments.

INTERNSHIP EXPERIENCE

- **WEB DEVELOPMENT INTERN | RMCUBE IT SOLUTION PVT LTD**

Jan 24 - Feb 24

During my Web Development Internship, I collaborated with a team to build responsive and dynamic web applications. I also worked on improving website performance, ensuring seamless user experiences, and troubleshooting issues related to both frontend and backend functionalities. This experience honed my problem-solving skills and deepened my understanding of both web development and networking principles.
